1970 - 1971

SCOTTISH BIRDS — BINDING

Arrangements have been made for binding Volume 6 of "Scottish Birds." The charge is £1.60 for binding in red buckram, or £2.20 for binding in red quarter leather, both prices including return postage. The parts to be bound (Nos. 1 to 8 and Index) should be sent direct to the binders together *with your remittance to cover the cost of binding*. Back numbers may be purchased from the Scottish Centre for Ornithology and Bird Protection, 21 Regent Terrace, Edinburgh, EH7 5BT, but NOT from the binders. Volume 1 No. 2 to Volume 5 No. 8 and any special supplement in these volumes cost 25p each. Volume 1 No. 1 and Volume 6 Nos. 1-8 cost 50p each. Volume 1 may also be sent for binding at the same time and at the same rates as Volume 6. *Please be sure to complete the binding form on the back cover* (with details of your name and address, remittance, and style of binding required) before sending the parts to:

P. G. CHAPMAN & CO LTD

Kent House Lane

BECKENHAM, KENT

BR3 1LD

Volumes sent *immediately* will be returned within about three months, but this time cannot be guaranteed for volumes not sent promptly, as costs can only be kept down by binding a substantial number of volumes at once.

Note The nature and thickness of the quarterly sections tend to produce steps in the fore-edge of the bound volume, but the extra cost of producing the journal in smaller gatherings, mainly for the benefit of those who want to bind their copies, would not be justified.

Scottish Birds

*The Journal of
The Scottish Ornithologists' Club*

D. G. ANDREW

Volume 6

1970 - 1971

Index

The index is in three parts. The first is a general index to the various sections of the journal; the second is a list of all papers and short articles; and the third is an index of all significant mentions of each species. Only the first page of each reference is given, except in the index of papers and short articles.

English names are used throughout. A full list of scientific names was given at the end of volume 2 (with additions at 3 : 454, 4 : 6/2 and 5 : 488), and the short key here lists only those species not previously mentioned.

The species index is selective rather than comprehensive. Titles of short papers and short notes dealing with particular species are included in abbreviated form, and various subheadings are added; otherwise only page numbers are given. All references in short and current notes, reviews of changes in status, local status lists, and lists of unusual occurrences, have been indexed. As most contributions are concerned with migration and distribution of birds in Scotland it may be generally assumed that where no further details of the references listed for a species are given they are mostly of this nature. Passing and comparative references have usually been omitted, and also references within the body of papers, reviews, obituaries and other contributions, unless they are status reports or considered of special interest apart from the context in which they appear. In particular it has to be emphasised that detailed and valuable information on migration and numbers of common birds, in papers such as the Isle of May reports, finds no place in the index to species.

Most records of migration, distribution and numbers appear in the annual Scottish Bird Reports (*Scot. Birds* 6 : 62-128 and 6 : 347-402). These references are indexed following the abbreviation sbr, but may embrace material related to other sub-headings in the same species entry.
